

## **Stephen Pike**

Stephen Pike is Head of Enel Green Power North America, where he leads and oversees Enel Green Power's renewable power generation business line in the US and Canada. Enel is the fourth-largest owner of clean power capacity in the US.

Mr. Pike brings 30 years of experience in the energy industry – over 20 of which are with Enel. He's one of the building blocks of Enel's presence in the United States as he was part of the leadership team of CHI Power, Inc. that joined Enel in 2000 in the company's first acquisition outside of Italy, as Enel Group started its growth in renewables around the world.

Stephen has held various positions at Enel starting in Engineering and Project Management roles. He has been part of the leadership team since the North American entity grew from being a hydropower-only company to adding wind, solar, geothermal and battery storage assets over the following years. From VP of North American Operations and Maintenance to most recently VP of Engineering and Construction, Mr. Pike has been instrumental in growing Enel's renewable energy portfolio in the US and Canada, now totaling over 9.7 GW.

He is a graduate of the University of New Hampshire with a Bachelor of Science in Civil Engineering degree. He is married, a proud father of 3 children, and enjoys nature, travel and good food.
