

Delivering **clean** and **flexible** solutions for a **reliable energy future**

We provide the clean energy that North America depends on.

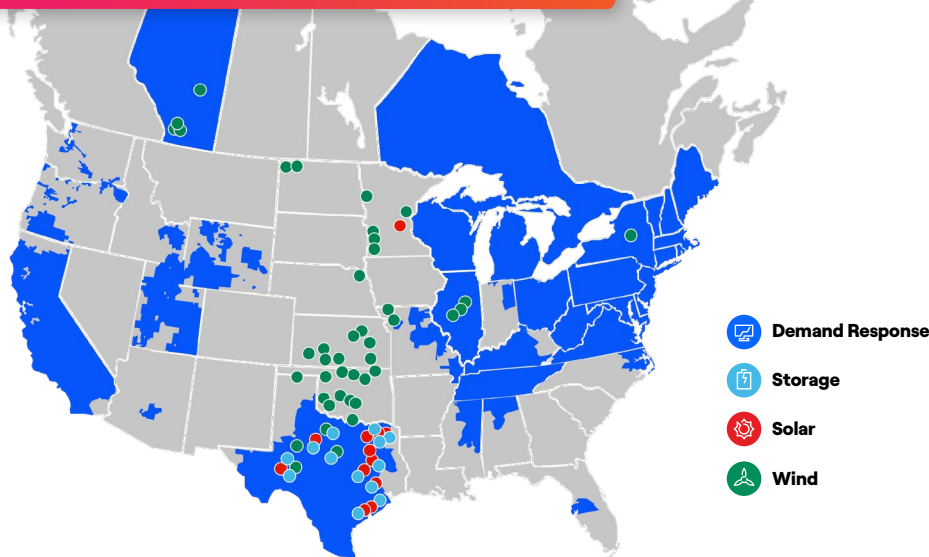

Local presence, global foundation

Enel North America is one of the largest clean energy companies in the U.S. and Canada. We own and operate renewable power plants and manage demand response programs. For 25 years, Enel has helped large energy users, like utilities, businesses and public institutions, decarbonize responsibly with clean and flexible energy solutions. Our portfolio includes over 11 gigawatts (GW) of wind and solar power, nearly 5 GW of demand response and over 1.4 GW of energy storage. With a presence across the U.S. and Canada, Enel North America is headquartered in Andover, Mass., and maintains offices in Houston, Dallas and Oklahoma City.

Enel North America is part of the Enel Group, a multinational energy company that has evolved into the largest renewable private player, the foremost electricity distribution network player by number of grid customers served and the biggest retail operator by customer base in the world. The Enel Group is the worldwide demand response leader and the largest European utility by ordinary EBITDA. Enel is present in 28 countries worldwide, producing energy with 91 GW of total capacity.

Our solutions

UTILITY-SCALE RENEWABLES AND STORAGE

Our renewables portfolio supplies major utilities, businesses and municipalities, helping them power critical infrastructure and achieve their energy goals.

11+ GW wind and solar power capacity

1.4 GW utility-scale storage — third-largest battery energy storage system operator in the U.S.

83 wind, solar, storage and hybrid plants across nine U.S. states and one Canadian province

DEMAND RESPONSE

Enel is the global leader in demand response. Our customers actively manage their demand in response to emergency conditions, high prices or energy production shortages to reduce costs, earn revenues and stabilize the grid.

4.8 GW of demand response capacity in the U.S. and Canada

10,800+ sites across 31 states and two Canadian provinces

81 demand response programs across nine ISOs, including 11 bilateral agreements with utilities

664 demand response events in 2024, delivering **16,219 MWh** of energy to the grid

ENERGY AND COMMODITY MANAGEMENT

We provide wholesale market access and intelligence to support long-term financial and environmental sustainability.

28.9 TWh in energy management services

12.8 GW of assets under management

131 PPAs signed with **76** unique customers across multiple sectors, including:

- Google
- Meta
- Adobe
- McDonald's
- Mondelez
- General Motors
- The Clorox Company
- Lululemon
- Gap Inc.

Sustainability at the center

Sustainability is a lever to generate economic and financial value.

Circular economy: Reducing waste and maximizing resource efficiency to minimize environmental impact

Biodiversity protection: Implementing measures to safeguard natural ecosystems near project sites

Community investment: Creating shared value through support for workforce development, STEM education and infrastructure projects in communities where we live and work

211

sustainability projects supporting 27,000+ beneficiaries in 2024

\$1.5 million

dedicated to sustainability initiatives in 2024

100%

global zero emissions target by 2040

About Enel North America

Enel North America, part of the Enel Group, is a proven renewables leader delivering clean, flexible and sustainable energy solutions. The company develops, builds, owns and operates renewable power plants and demand response solutions, with over 11 gigawatts (GW) of installed wind and solar capacity, over 1 GW of energy storage and nearly 5 GW of demand response in the US and Canada. Enel is a top-five industry leader for clean power, demand response and utility-scale battery storage capacity in the United States.
